LANDING PAGE

Project @ <https://lnkd.in/dhURun7q>

- Interactive user friendly website, it is a bibliotherapy web page.
- The user insert their emails to connect and get the recommended book. I used Html, Css & basic JavaScript.

TRIBUTE DOCUMENTATION PAGE

Project @ <https://tributedocumentationpage.netlify.app>

- It shows JavaScript information, from variables all to functions.
- It's a FreeCodeCamp project where I used Html & Css, JavaScript was already scripted. I use Netlify to host the project

PERSONAL PORTFOLIO WEBSITE

Project @ <https://rosetebogondhlovu.netlify.app>

- I built this website to showcase my projects
- I used Html Css & basic JavaScript
- I use Netlify to host the project

WEATHER APP

Project @ <https://weatherwiseeapp.netlify.app>

- It's a fully responsive functional weather app, the user is prompt to enter any city and it will display it , together with the date & time, wind speed, humidity & 4 days forecast.
- I used Html, Css, JavaScript & Api.
